# PEPTIDES

An integrated approach to preserving youth and beauty

Science and anti-age technologies are constantly developing. The specialists of our company continue to study the properties of plant components and peptides in order to improve the composition of cosmetic products. Currently what is expected from anti-age cosmetics is that they will comprehensively solve the problems caused by aging: it is necessary to fight the processes of oxidation, cell destruction, protein degradation, and glycation.

Beauticians are sure that age-related changes in the skin begin to occur long before you see their effects in the mirror. At fault are external and internal factors that leave an indelible imprint on our appearance. That is why it is

important to treat your skin with special care, as it is much easier to prevent signs of aging before they even appear.

Peptide cosmetics — is a promising direction in cosmetology. Peptides enter the deeper layers of the skin and influence the processes that take place in cells. They increase local immunity, thereby creating a barrier that protects the skin from damaging effects of UV radiation, free radicals, aggressive environmental influences and stress. Thus, the peptides in cosmetic products prevent the appearance of signs of aging. The undisputed advantage is that they are safe and do not have any side effects.

Peptides laboratory specialists have created a care program that allows you to look perfect 24/7, at any age.

The developments of the specialists of the scientific department proved that premature age-related changes could be prevented! It is advisable to start their prevention from the age of 25–30. After all, every time we saturate our skin with vital components, we preserve our youth.

# REVILINE® PRO

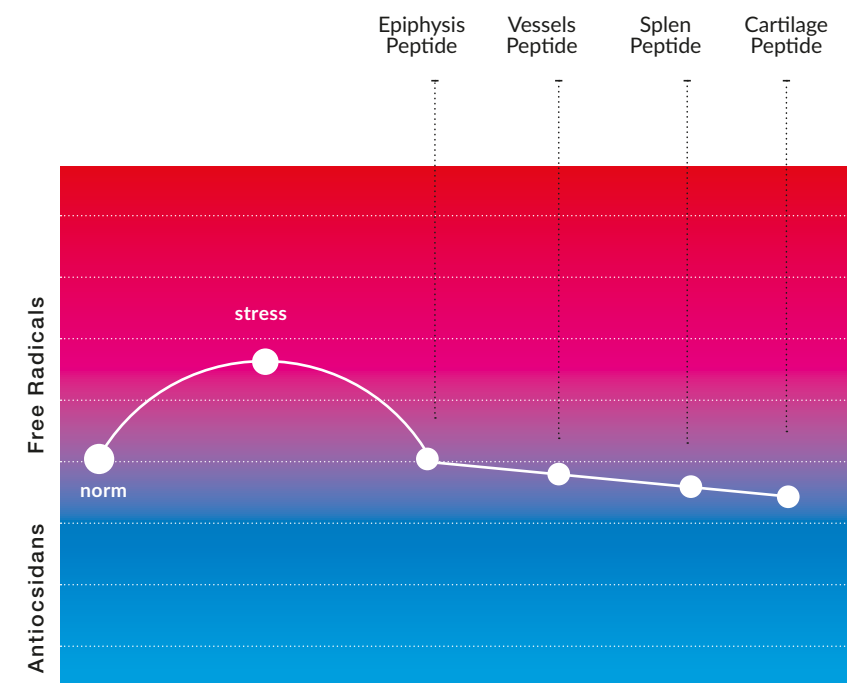

A SERIES OF VALUABLE NOURISHING SKIN CARE CREAMS WITH SHORT PEPTIDES

**REVILINE PRO** — a series of skincare creams with short peptides acting as a trigger for the mechanisms of cell rejuvenation. The unique combination of narrowly targeted peptide substances, effective herbal extracts and natural oils helps resist skin aging and destructive effects of aggressive factors.

Short peptides of the epiphysis, immune system, bone and cartilage tissue and vascular wall, which are part of the creams of the REVILINE PRO line, can affect the metabolism in skin cells and support it at an optimal level.

Plant extracts provide an intense and gentle effect. They feed and moisturize the skin, strengthen its surface, and stimulate the metabolism processes. Natural oils and extracts are valuable sources of natural biologically active substances, vitamins, polyunsaturated acids, that help slow down aging processes.

With the regular use of REVILINE PRO professional creams, your skin will be transformed from day to day. It will be filled with moisture, freshness and again will shine with youth and health.

Series  
**REVILINE PRO**

## Restorative **REVILINE® PRO**

**REVILINE® PRO** regenerating cream will help solve the problem of dryness and peeling, it is effective in returning natural radiance to your skin.

Regulates the synthesis of melatonin in skin cells. Has antioxidant activity. Epiphysis peptides regulate metabolic processes and enhance protein synthesis, normalize lipid peroxidation processes in cells, and eliminate negative effects of external and internal adverse factors on the skin.

Contains: **AA-1 peptide complex (short epiphyseal peptides)**, oils: olive, palm, jojoba, castor; extracts: licorice, horse chestnut, ginger root, chamomile flowers, vitamins A and E, liposomes with vitamin C

## Regenerating **REVILINE® PRO**

**REVILINE® PRO** regenerating cream is used on dull, prone to inflammation and acne skin.

Activates skin cell regeneration processes, and improves the processes of cellular metabolism. Spleen (or B-link immune system peptides) stimulate tissue recovery, synthesis of tissue-specific proteins, proliferative and metabolic cell activity, accelerating their renewal. Due to this, the collagen structure of the skin strengthens and increases its elasticity. The cream has anti-inflammatory and antioxidant effects.

Contains: AA-3 peptide complex (B-link immune system short peptides), oils: cocoa, olive, palm; bioflavolipid complex Activitin, extracts: licorice root, pomegranate seeds; cinquefoil, vitamins A and E

Series  
**REVILINE PRO**

## Firming REVILINE® PRO

REVILINE® PRO firming cream is used on withered and sagging skin.

Restores the collagen structure of elastic skin fibers. Cartilage peptides regulate metabolic processes in connective tissue, stimulate the regeneration of fibroblasts and keratinocytes, prevent destructive changes in skin collagen structure, contribute to effective skin tightening, and activating protein synthesis in cells.

Contains: AA-9 peptide complex (short cartilage peptides), oils: cocoa, linseed; extracts: pomegranate seeds, licorice root and horse chestnut; ginger root.

 50 ml

Series  
**REVILINE PRO**

## Intensive REVILINE® PRO

Cream REVILINE® PRO intensive is used on skin with a visible cosmetic defect caused by dilation and fragility of small blood vessels (vascular nets and stars on cheeks and nostrils).

Strengthens and regulates skin vessel walls permeability. Increases skin turgor. Blood vessel peptides regulate metabolic processes in the vascular walls, normalize vascular tone, prevent the development of hypercoagulability, and restore disturbed microcirculation in organs and tissues under the influence of unfavorable environmental factors and emotional stress.

Contains: AA-7 peptide complex (short peptides of the vascular walls), oils: olive, castor, wheat germ, grape seeds; cinquefoil, extracts: licorice root, calendula, pomegranate seeds, horse chestnut; chamomile flowers.

# REVILINE®

## SERIES OF COSMETIC PRODUCTS WITH NATURAL PEPTIDES

The REVILINE series confidently occupies a leading position among skin care products with a pronounced anti-age effect.

The peculiarity of the REVILINE line is determined by the group of natural peptide complexes included in the products with various purposes of application. Thanks to the action of natural peptides, metabolism in skin cells is restored and maintained at an optimal physiological level. The skin's texture, color and hydration improve, and a lifting effect is achieved.

Natural peptides easily enter the deeper layers of the skin, since their molecular weight is much less, than the weight of

proteins. The lipophilization (a process of combination of an element with a fatty base, which is present in all creams) of peptides further improves their penetration.

REVILINE peptide series cosmetics also include the strongest antioxidant complexes of superoxide dismutase (SOD) and its inducers. These complexes have antioxidant, immunomodulatory, UV protection, anti-radiation and antitumor effects, significantly accelerating the processes of detoxification and regeneration of skin cells.

In addition, the composition of creams Reviline 04 for problem skin against nets and stars include "Betulavit", the base of

which is birch bark extract – a triterpenoid class substance. During the study of this substance, it was found that betulin has antibacterial, anti-inflammatory, and moisturizing properties.

REVILINE is a cosmetic line created at the overlap of cosmetology and pharmacology, which combines the properties of innovative anti-aging and healing products. Recommended for use starting at the age of 25–30.

### Use Recommendations

**Creams from the REVILINE series are designed for the face and body. Thanks to these products, you will find a solution for almost any of your needs.**

**There are seven creams for the face: RN 01 - RN 07, and five creams for the body: RN 08 - RN 12.**

Creams RN 02 and 03, day and night, provide basic facial skincare. The peptide complex of the thymus helps to increase local immunity, skin regeneration, and improves metabolic processes.

Creams for the skin around the eyes RN 05 and RN 06 are enriched with Neovitin®, a bioantioxidant complex based on ginseng. It helps smooth out wrinkles and prevents the appearance of new ones, nourishes the skin, stops its dehydration, increases its elasticity, and stimulates intensive production of collagen, etc.

One of the trends in modern cosmetology is to use different products for different parts of the face. For example, to treat areas with high activity sebaceous

glands with mattifying and drying creams (RN 04 for oily and acne-prone skin). For the cheeks and forehead, use creams with pronounced softening and moisturizing action (e.g. RN 02 daily cream or RN 01 anti-wrinkle cream).

Body creams from the REVILINE series help fight the most common problems. You will find a remedy for stretch marks and scars (RN 08), cellulite (RN 09), varicose veins (RN 11). You can apply the cream RN 08 "Smooth skin" after showering and rub it in with massaging movements until it is completely absorbed by the skin. Anti-cellulite cream RN 09 – apply to problem areas with vigorous massaging movements.

The rejuvenating cream RN 11 is intended for legs. Use it every day. The cream contains peptide complexes of vessels and cartilaginous tissue, and horse chestnut extract, which is effective against varicose veins thanks to two substances: esculin and escin. These components lower blood viscosity, strengthen the blood vessel walls, prevent the formation of blood clots and improve blood flow. Horse chestnut extract improves metabolism, removes excess fluid

and possesses anti-inflammatory, analgesic, capillary-strengthening properties.

For hand skin care, we offer the nourishing cream RN 10. It contains vascular, cartilage tissue and thymus peptide complexes, Neovitin® complex and vitamins A and E. The RN 10 cream moisturizes the skin of the hands and protects it from the cold, insolation, and stimulates cell renewal processes. During the day apply the cream on clean skin of the hands and distribute it with massaging movements until complete absorption.

To combat corns and cracked feet, use RN 12 cream. One of its main components is a bioflavolipid complex Activitin®, consisting of medicinal plant extracts: sage, chamomile, calendula and St. John's wort. Thanks to Activitin® and vessel peptide complexes (cartilaginous tissue and thymus peptides), the cream has unique healing properties, reducing inflammation and providing nutrition, hydration, antimicrobial and antioxidant protection.

## REVILINE tonics use recommendations

Using tonics has become an integral part of our daily skincare routines. Its main task is to tone the skin. Besides that, it does a number of other very important functions: completes the purification process, restores the pH balance, and prepares the skin for the application of serum or cream (because of the tonic, some components of serums or creams become more efficient). If you noticed a dull complexion, peeling or enlarged pores —

include a tonic into your daily skincare routine. It will help reduce the severity of some problems. Use it regularly for a month (at least) to see a significant result.

The REVILINE line includes two types of tonics: micellar cleansing and designed to restore the pH balance. Both are suitable for all skin types.

The micellar tonic can be used instead of your usual make-up remover. It draws

out impurities from the pores and perfectly removes makeup. Just do not forget to rinse off the rest of the tonic with water after use.

The “pH-balance tonic” has a slight refreshing effect and leaves your skin with a pleasant feeling. Apply in mornings and evenings on clean dry skin with a cotton disk along the massage lines.

### pH Balance Tonic

The tonic restores the acid-base balance of the skin of the face, thanks to its Rubixyl® peptide, which can be called an assistant in the fight against everyday stress. With regular use the skin's resistance to various stressful influences significantly increases, wrinkles smooth out and the general complexion improves.

Contains: **Rubixyl®**, extracts of Canadian fireweed, myrtillus, lemon balm leaves, magnolia buds, panthenol.

### Micellar Cleansing Tonic

Designed for gentle and effective removal of make-up, various contaminants that inevitably settle on the surface of the skin during the day, waste products of epidermal cells and sebaceous glands from your face and eyes. The procedure of cleansing prepares the skin for further care steps, and the effectiveness of the use of other products highly depends on the quality of the cleanse. The combination of restoring and moisturizing ingredients and soft surfactants in the tonic provide thorough and gentle cleansing.

Contains: witch hazel hydrolate, **green coffee extract**, panthenol, hydrolyzed castor oil.

## “REVILINE Petals” use recommendations

“Petals” (patches) for the delicate skin around the eyes from the REVILINE series will come to your rescue, if you need to quickly put yourself together, and refresh your eyes. They are rightly called a super-product, because they are amply soaked in beneficial ingredients that moisturize and nourish the skin. Besides “REVILINE Petals”, contain natural peptides of the vascular wall, bone and cartilage tissue and thymus. Thanks to them, the tone of the skin around the eyes is restored, becomes smooth, soft and elastic, and the regenerative processes are faster.

Peptides fabric patches improve blood circulation and strengthen the blood vessel walls. After using them the skin looks healthy and fresh.

The Hydromoiist Plus® complex based on seaweed in the composition of the “Tightening Petals” provides a visible lifting effect. Sweet

almond seed extract Polylift® evens out the microrelief of the skin and creates the effect of an instant lift.

“Petals from edema” are excellent helpers in the fight against swelling and dark circles under the eyes. They contain Actiflow® yeast extract, which strengthens the capillary system and stimulates blood circulation. Moreover, they contain the vascular wall (A-3) peptide complex, which normalizes the vascular tone and regulates metabolic processes.

“REVILINE Petals” contain sodium hyaluronate, which improves skin tone and stimulates the formation of collagen fibers.

“Petals” from Peptides are shaped like water drops. If you need to erase traces of fatigue, then place the wide part of the petal under the inner corner of your eye. If you seek to smooth out wrinkles, then do the opposite — put the petal with its “pointy

tail” inwards, and with the wide part outwards. “REVILINE Petals” can be used in the morning and evening (not later than 2 hours before sleep). Keep them on for 15–30 minutes. It is not necessary to rinse off the residue, just massage it into the skin with light patting movements.

It is recommended to use “REVILINE Petals” 1–2 times a week. They contain active ingredients in a high concentration, so using them every day is unnecessary. One pack of the patches can last you for a whole month.

## “Lifting Petals”

“Lifting petals” with a moisturizing effect are designed for emergency assistance to the delicate skin around the eyes. Thanks to the active ingredients, they provide an instant lifting effect, acting in the deep layers of the skin. The patches stimulate processes of tissue regeneration, strengthen the collagen structure of the skin and increase its elasticity, have an antioxidant effect, due to which a visible rejuvenation effect is achieved in the shortest possible time. The ingredients included in the composition of the “Petals”, regulate the metabolic processes in the connective tissue and contribute to the effective tightening of the skin.

Contains: **peptide complexes A-4 (cartilaginous tissue), A-6 (thymus)**, glucose, glycerin, sweet almond seed extract, collagen hydrolyzate, sodium hyaluronate.

 4 packs containing 2 petals each

## “Petals from edema”

“Petals from edema” return freshness and elasticity to the delicate skin around the eyes. With active ingredients and modern manufacturing technologies, they contribute to the rapid disappearance of edema and swelling. “Petals” normalize the vascular tone, restore malfunctioning microcirculation, strengthen the collagen structure of the skin and increase its elasticity, moisturize the delicate skin around the eyes, have an antioxidant and anti-stress effect, due to which a visible rejuvenation effect is achieved in the shortest possible time.

Contains: **peptide complex A-3 (vessels)**, glycerin, yeast extract, sodium hyaluronate.

 4 packs containing 2 petals each

# REVILAB® EVOLUTION

ANTI-AGE COSMETICS SERIES BASED ON PROFESSIONAL PEPTIDES

The task of REVILAB EVOLUTION cosmetics is to awaken the skin's own regenerative and protective powers in order to eliminate imperfections, restore its freshness and flawless look.

Let us start our acquaintance with the REVILAB EVOLUTION series with M-Revitalizer, a unique anti-aging product for daily care. Its composition includes components that are considered the latest achievement of modern cosmetology. Those are professional substances, each of which is designed to solve a specific problem. The Moist 24™ complex moisturizes the skin and maintains the optimal level of its moisture content. Unirepair T-43 provides protection from aggressive environmental factors such as overheating, ultraviolet radiation, and air pollution. It also contains tyrosine, proline, adenosine triphosphate and vegetable protein hydrolyzate. This complex removes signs of stress, inflammation, redness, and protects the DNA of the skin cells from damage.

Two lipopeptides in the composition of M-Revitalizer deserve special attention. The first is Syn®-Coll. It is considered an activator of such main components of the dermal matrix as laminin-5, type I collagen and transforming growth factor β, which controls many functions in most cells. Due to the inhibitory effect on metalloproteinases Syn®-Coll helps reduce the appearance of wrinkles by 12 %, and in the future helps achieve more remarkable results because it stimulates the synthesis of hyaluronic acid, as well as type I collagen (its production increases by 70 %) and transforming growth factor β (its production increases by 35 %.)

The second lipopeptide is Progeline™ (it is also found in Revilab Evolution No. 7).

This lipopeptide inhibits the production of progerin - one of the most important markers of skin aging; suppresses the expression of elastase and matrix metalloproteinases of types 2, 3 and 9 – agents that destroy collagen and elastin in the skin. Against this background, the synthesis and assembly of collagen are optimized, and the production rate of components of the dermoepidermal connections increases. After 28 days of using products, containing Progeline™ skin elasticity improves by 20 %.

The undisputed flagship of the REVILAB EVOLUTION series is the Revilab Evolution No. 7 serum, created based on the latest achievements in cosmetology. It provides resistance to fundamental factors of aging, but also eliminates the signs of maturing skin. Revilab Evolution No. 7 serum solves several tasks at once – removes signs of aging and gradually reconstructs all layers of the skin.

The primary effect – to relieve fatigue, moisturize the skin, and give it elasticity and radiance – is provided by the large tree fern extract Liftessense®, which forms a fine molecular net (kind of veil), sculpting the oval of the face and reducing the appearance of wrinkles only within an hour by 10 %.

Pomegranate seed extract and low molecular weight hyaluronic acid restore skin elasticity, and the integrity of the epidermis hydrolipid mantle, which manifests itself in the form of an instant lifting effect.

Two professional components are responsible for the reconstruction of skin layers: Progeline and Matrixyl® Synthe'6™.

The central component in the composition of the serum is Matrixyl® Synthe'6™, which restarts the synthesis of six major components of the matrix and the dermo-

epidermal connection: type I, III, IV collagen, fibronectin, hyaluronic acid, and laminin-5. In addition, Matrixyl® Synthe'6™ stimulates the production of heat shock proteins (Hsp: Hsp60, Hsp70, Hsp90), which have an anti-stress effect on the skin and set in motion the mechanisms of matrix repair due to collagen and elastin.

One of the most important effects of Matrixyl® Synthe'6™ is the stimulation of the synthesis of Hsp47, a chaperone that is involved in the assembly of type I, II, III, IV and V collagen.

The serum begins to work within 5–10 minutes and develops its effect over several weeks, day by day creating your new image.

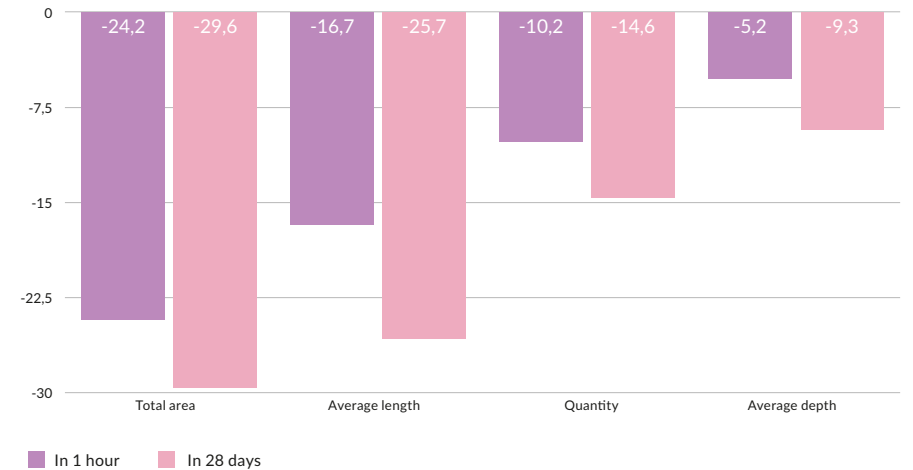

REVILAB No. 3 series (Peptide Revitalizer and Eye-Line Filler) can definitely be called our main achievement in the field of professional cosmetics for home use. They contain a component with an express lifting effect (HPE-4) and epiphysis peptides – telomerase inducer and restorer of sensitivity of fibroblasts to various stimulations. Telomerase activity of the epiphyseal peptide manifests itself in relation to cells under stress and affected by various negative influences. The epiphyseal peptide returns sensitivity to fibroblasts due to enhancing the synthesis of extrapineal melatonin using Merkel neuroendocrine cells, as well as due to direct telomerase activity. Because of this, the number of CD44 receptors on the surface of fibroblasts significantly increases, which is an indisputable marker of their synthetic activity (synthesis of hyaluronic acid, procollagen, epidermal growth factor).

The Neodermyl® component (in the Eye-Line Filler) is responsible for the correct assembly of collagen from procollagen.

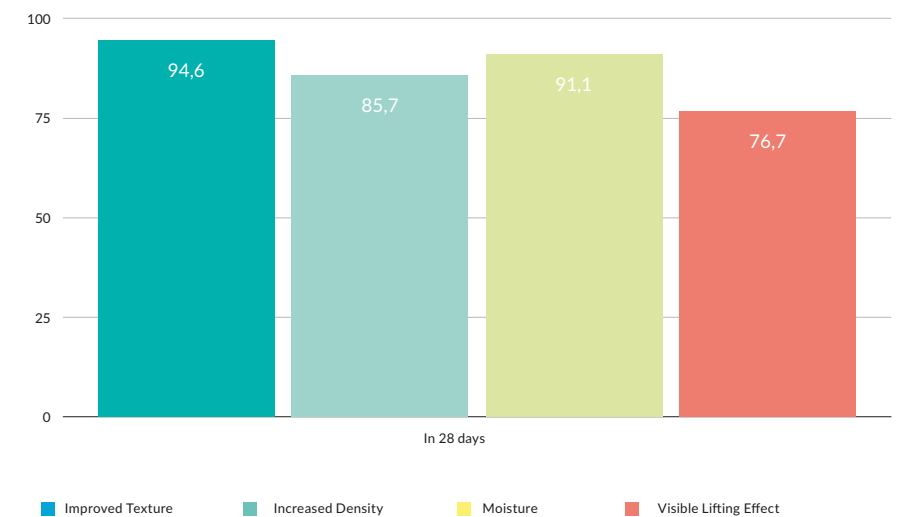

Unirepair T-43 is responsible for the formation of a protective screen on the surface layers of the skin and Thermostressine® peptide (in PeptideRevitalizer).

Peptide Revitalizer was primarily designed to resist factors that accelerate the skin aging process, and in order to activate all protective mechanisms of the skin. In addition, **Peptide Revitalizer** contains Dermaxyl® [a complex of so called cementum stratum corneum (i.e. ceramides) and hexapeptide 12 (fragment of elastin)]. This complex strengthens the epidermis, reduces transepidermal moisture loss, but most importantly, it allows you to recycle defective collagen and defective matrix components and prepare the base for the resynthesis of new elastin.

The action of Eye-Line Filler is primarily directed at reconstructing the dermal matrix and its correct assembly (Matrixyl® Synthe'6™, Neodermyl®). The revolutionary Leuphasyl® peptide, the action of which is fundamentally different from any other known peptide, reduces existing epidermal and facial wrinkles around the eyes. It is a moderate calcium channel blocker, which allows to gently and effectively manage muscle tone. As a result of its application, wrinkles in the area around the eyes are reduced by 28 %.

Revilab No. 7. Wrinkle parameters. Sample of 56 women, aged between 36–45 years.

Series

REVILAB EVO

# REVILAB EVOLUTION® No.7

Anti-aging serum

Modern premium skin reconstruction. Its main task is to return youth, freshness and elasticity to your skin. The serum fights premature aging, improves skin's condition and models the oval of the face. It moisturizes and smoothes the skin, visibly reducing deep and mimic wrinkles. The serum includes lipopeptides with an intellectual delivery system of molecules to target cells. REVILAB EVOLUTION® No. 7 works in several stages, weakening the influence of genetically programmed aging factors and helps eliminate existing age-related changes.

The Progeline™ peptide, one of the main components of the serum, consists of three

amino acids and, has the ability to inhibit the synthesis of the main protein of aging — progerin. It also slows down the aging process at the cellular level and provides a complex modeling effect. The Matrixyl® synthe'6™ peptide prevents the appearance of wrinkles and reduces the visibility of already present ones. The Liftessense™ component, due to the formation of a mesh film structures on the surface of our facial skin, that help increase tone and elasticity of the skin, gives an instant lifting effect. Low molecular weight hyaluronic acid penetrates deep layers of the skin, giving it elasticity and good blood supply due to the ability to retain

water in the tissues. Pomegranate seed extract contains essential polyunsaturated fatty acids and biologically active substances that have a pronounced anti-aging action. Evening primrose oil has a regenerating effect, and perfectly moisturizes and nourishes the skin.

Contains: **Progeline™ peptide**, **Matrixyl® synthe'6™ peptide**, **Liftessense™** (Cyathea cumingii fern leaf extract), evening primrose oil, hyaluronic acid, pomegranate seed extract.

15 ml

# REVILAB® No.3

## PEPTIDE REVITALIZER

Facial revitalizer with inductive telomerase

An effective cream based on professional peptide substances strengthens and saturates the skin with energy, fights dehydration, dull complexion and wrinkles. Its task is to restore the natural strength of the skin, erase traces of age-related changes and signs of fatigue. The complex of peptides promptly restores cell function and promotes skin matrix regeneration. The combination of low molecular weight hyaluronic acid and plant extracts promotes skin rejuvenation and nutrition.

Contains: **AA-1 (pineal gland) peptide complex**, HPE-4, oils: wheat germ, green coffee, evening primrose; Unirepair T-43, **Thermostressine®**, **Dermaxyl®**, extracts: amaranth seed, pomegranate seed; hyaluronic acid, vitamin E, coenzyme Q10.

! ⚙️ 🕒 20 ml

## EYE-LINE FILLER

Active filler for the skin around the eyes

The combination of the pineal gland peptide complex, plant extracts and hyaluronic acid has a systemic effect on the skin around the eyes, making it look younger, healthier, firmer, hydrated, toned, and small wrinkles are filled from the inside. EYE-LINE FILLER offers a cumulative effect, providing a rejuvenating result over time.

Contains: **AA-1 Peptide Complex (Epiphysis)**, **Matrixyl® Synthe'6™**, sweet almond oil, green coffee, HPE-4, Lanacityn® PF, Leuphasyl®, Lanablu™, Neodermyl®, Hydrogenated Castor Oil, Peach Oil, Hyaluronic Acid, Vitamin E, Extracts: Sage, pomegranate seeds, horse chestnut.

! ⚙️ 🕒 15 ml

# REVILAB® M-REVITALIZER

Face revitalizer for men

The main task of the anti-aging revitalizer for men is to slow down the skin aging process. The complex of peptide substances has a powerful regenerating effect: with their help, you can reduce the depth of wrinkles, eliminate dull complexion, make skin firm and smooth. The interaction between plant extracts and low molecular weight hyaluronic acid provides a moisturizing and regenerating effect. **REVILAB® M-REVITALIZER** cream is fit for use after shaving.

Contains: **Syn®-Coll**, **Progeline™**, **Moist 24™** (based on emperors cylindrical root extract), shea butter, green coffee butter, Unirepair T-43, evening primrose oil, hyaluronic acid, pomegranate seed extract, ginseng extract, vitamin E.

!   50 ml

## NEW REVILAB® CLEANSING FOAM

Cleansing and moisturizing  
for all skin types

The cleansing foam from the REVILAB series gently treats your skin. It effectively removes contaminants, makeup and excess sebum. It does not irritate, dry the skin or leave a greasy shine. The foam provides a long-term feeling of freshness and comfort. It is convenient to use, simply apply to wet skin and massage in circular motions for a few minutes. Then rinse your face with water. For best effect, use the cleansing foam in mornings and evenings.

Contains: soft surfactants, glycerin, betaine, squalane, wheat proteins, panthenol, and milk proteins.c.

# SPA LINE

## PEPTIDE-BASED COSMETICS FOR BODY AND HAIR CARE

**SPA LINE** was created taking into account modern trends and latest technologies in the field of SPA-cosmetology. All of the **SPA LINE** series products include peptides, the bioantioxidant complex Neovitin® and the bioflavolipid complex Activitin®.

Due to the peptides in the products, the process of independent cellular regeneration is launched. Peptides are excellent conductors of active ingredients from the product to the skin cells and hair follicles.

### ACTIVE COMPONENTS FROM THE SPA LINE SERIES

**Cocamidopropyl betaine** is a mild, amphoteric surfactant derived from coconut oil fatty acid amides. It is one of the most gentle and safe surfactants. It has an antistatic and conditioning effect on the hair, facilitates combing dry and damaged hair, provides high-quality care for the scalp, and gives pleasant cleansing and foaming.

**Sodium lauroyl methyl isethionate** — a very mild anionic surfactant that gently cleanses the scalp without damaging the protein structure of the hair, and provides a pleasant creamy foam.

**Cocoglucoside** — a natural amphoteric surfactant, with mild foaming, which is obtained from dried coconut meat and fruit sugar. As part of the shampoo it smoothes the hair structure and gives volume.

**Sodium lauroyl sarcosinate** is a new generation natural anionic surfactant derived from sarcosine, a natural amino acid found in fruits and vegetables. Soft cleanser safe for the skin while effectively removing dirt, bacteria and sebum. Non-drying, suitable even for sensitive skin. Gives your hair liveliness and radiance, while gently cleansing and improving its texture.

Vascular walls peptide complex A-3 (AA-7 in shampoo) strengthens vessel walls, im-

The best effect is achieved by means in which peptides act in combination with valuable oils, algal and vegetable extracts, as well as with various vitamin complexes.

Note that the SPA LINE hair products are enriched with milk proteins that have moisturizing, softening and regenerating properties, rich in amino acids, due to which peeling stops, and the skin becomes smooth and soft.

The SPA LINE body and hair care products do not contain parabens, sulfates, or dyes,

proves blood microcirculation in the scalp, and restores the nutrition of hair follicles.

**Cartilage peptide complex A-4 (AA-9 in shampoo)** strengthens hair roots in hair follicles, improving the structure of the scalp.

**Thymus peptide complex A-6 (AA-2 in shampoo)** stimulates the regeneration of hair follicles, and increases local nonspecific immunity of the skin.

**HPE-4 Anti-Aging Complex** strengthens hair follicles, prevents and stops hair loss.

**Milk proteins** effectively restore, moisturize and soften hair, making it more manageable, smooth and pleasant to the touch. They contain essential amino acids responsible for nourishing the skin and producing keratin, collagen and elastin.

**Yoghurt powder** has unique conditioning and strengthening properties of the hair shaft, helps to restore the normal pH level of the scalp, effectively moisturizes the scalp, and makes hair soft and shiny.

**Natural wheat gliadin protein** extract acts as a building material, deeply enters the hair shaft under the cuticle scales to places with lost protein and fills the voids in the hair. It also helps restore the damaged structures of dry and brittle hair.

**Olive oil** softens and nourishes the scalp and hair follicles, fights inflammation, flaking and dryness, promotes the recovery of the

and do not cause allergies. They were developed using the latest advances in cosmetic industries and recipes with natural components. This combination allows you to achieve an impeccable, well-groomed appearance and a sense of inner beauty and harmony.

hair structure, making it silky and filled with a satin shine.

**Castor oil** softens and nourishes the scalp and hair follicles, eliminates dryness and flaking, ensures the formation of keratin that mends split ends, prevents brittleness, and restores elasticity and hair smoothness.

**Ethylhexylcocoate** has the ability to "link" the scales of the hair cuticles, softens and moisturizes dry damaged hair, and instantly creates the effect of a mirror shine.

## PEPTIDE SHAMPOO®

Shampoo for all hair types

This shampoo gives hair vitality, elasticity and volume. Its structure includes components that do not damage the protein structure of the hair, and have an exceptionally soft washing effect. It allows you to achieve and maintain a constant pH level of the scalp (close to the norm). Provides a good cleansing and a soft degreasing effect, which has a preventive result against scalp skin diseases. With regular use, it restores the structure of damaged hair, giving it a healthy appearance.

Contains: peptide complexes AA-7 (vessels), AA-9 (cartilaginous tissue), AA-2 (thymus), Neovitin® bioantioxidant complex, HPE-4 anti-aging complex, milk proteins, yogurt powder.

## PEPTIDE CREAM-MASK®

Cream-mask for hair

The cream-mask enters deeply into the hair structure and restores its damaged layer. It activates metabolic processes in the scalp, improves blood supply to the hair roots, the condition of the hair follicles, and promotes hair growth. The mask protects the hair from aggressive environmental influences, makes it shiny, smooth and silky, and enriches it with nutrients.

Contains: peptide complexes A-3 (vessels), A-4 (cartilaginous tissue), A-6 (thymus), olive oil, castor oil, bioantioxidant complex Neovitin®, extract of natural wheat protein gliadin, ethylhexyl cocoate.

## PEPTIDE BALSAM®

Hair conditioner

The conditioner enhances the effectiveness of the shampoo and is designed for intense nutrition and complete hydration. It acts at the cellular level, reconstructing the structure of the hair, makes it stronger and more robust, strengthening and restoring from the inside. As a result, the main tasks are solved: the hair structure is restored, its strength increases, it is filled with vitality, becomes soft to the touch, and obtains a healthy glow.

Contains: peptide complexes A-4 (cartilage tissue), A-6 (thymus), olive oil, bioflavolipid complex Aktivitin®, natural wheat gliadin protein extract.

## PEPTIDE CREAM-SOAP®

Cream-soap

The cream-soap is a unique tool in the fight against irritation, dryness, peeling and redness of the skin. It effectively cleanses and disinfects, tones and soothes the skin, restoring its health and softness. Thymus peptides stimulate regeneration of skin cells, strengthen its collagen structure, increase elasticity, and have an antioxidant effect. Cartilage peptides help tighten the skin, and regulate metabolic processes in connective tissue.

Contains: peptide complexes A-4 (cartilaginous tissue), A-6 (thymus), glycerin, bioflavolipid complex Aktivitin®.

## Spa Line Soap Use Recommendations

Peptides solid soaps are a real example of an eco product. They do not contain artificial scents or coloring. Their fragrance is created solely by the combination of essential oils and herbal extracts. In addition, the «Rejuvenating» and «Care» soaps are handmade products.

Peptides solid soaps are suitable for the body, hands and face. In this case, the «Rejuvenating» soap can be used to remove makeup. The soap contains vegetable glycerin. It improves skin elasticity and eliminates dryness. Glycerin contributes to the rapid restoration of the epidermis, as it is hygroscopic (its molecules absorb and accumulate moisture and due to a small size penetrate deep into the skin to help hydrate all its layers). In addition, glycerin performs a protective function — filling fine wrinkles and microcracks with moisture, it prevents dust particles and microorganisms from getting

into the upper skin layers and thus protects the epidermis from inflammation and irritation.

Soaps also contain many oils. For example, thanks to the delicate and gentle action of olive oil, Peptides solid soaps can be used to cleanse dry and sensitive skin. Cocoa butter helps the «Caring» soap produce a creamy foam, nourishes and tones the skin, makes it soft and smooth to the touch. Castor oil perfectly softens the skin, and promotes its regeneration. Camelina oil increases skin tone, stimulates cell turnover and prevents premature fading of the skin.

Plant extracts of chamomile, linden, and calendula flowers provide an antiseptic effect, and gently protect the skin from aggressive influences of the external environment.

Vitamin E in the soaps has antioxidant properties. Vitamin F contributes to the maintenance of the hydrolipidic balance of the skin,

and is effective for acne prevention. Thanks to the combination of vitamins E and F, the protective barrier of the epidermis is restored and the youthfulness of the skin is maintained.

After applying our soap, a pleasant feeling of freshness remains with you all day. During use, the soap does not dry out and crack or get soggy.

### REJUVENATING SOAP

Handmade with peptides

The soap not only gently cleanses and moisturizes the skin, but also protects it from aging. This action is provided by highly active components - copper-containing peptide (GHK-Cu), HPE-4 and a range of herbal extracts. The soap tones and refreshes the skin, improves your mood, and gives a charge of energy for the whole day.

CONTAINS  
PEPTIDES

### CARE SOAP

Handmade

The soap has a soothing and anti-inflammatory effect. Modern anti-age components HPE-4, snail secretion filtrate in combination with natural oils and plant extracts helps prevent the skin from aging, provides nutrition, increases elasticity and hydration, improves its texture and quality. It has antiseptic properties, gently cleanses the skin, restoring its health and comfort.

Contains: HPE-4, snail secretion filtrate, saponified vegetable oils (olive, camelina, coconut, palm, corn, castor), vegetable glycerin, olive oil, cocoa butter, chlorophyll paste, flower extracts: chamomile, linden, calendula; vitamins E, F, Glycoderm™ complex.

# MESOTELS FOR EXTERNAL USE

INNOVATIVE TECHNOLOGIES FOR BEAUTY AND HEALTH

Mesotels have long established themselves as effective anti-aging complexes for the skin of the head, body, face and neck. In order to influence the maximum number of links in the development of premature skin aging, an anti-aging complex HPE-4 (new generation of biogenic amines) and Neovitin® were created.

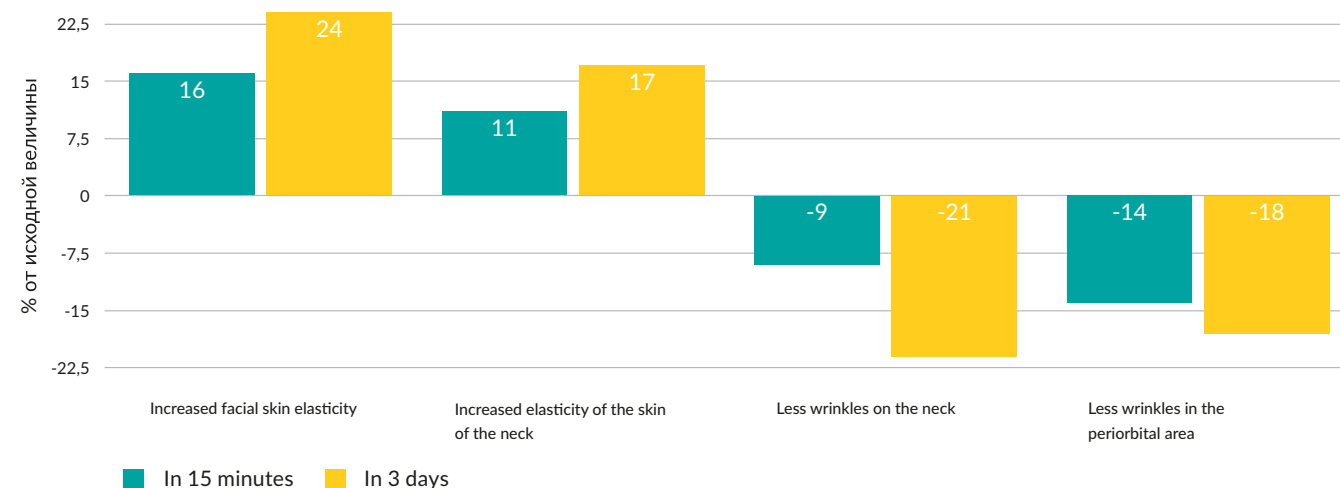

The complex helps smooth fine wrinkles, moisturizes the skin, and increases its elasticity.

One of the most important aspects of the action of HPE-4 is associated with immediate contraction of keratinocytes (lifting) and a decrease in the transdermal moisture loss from the skin.

Neovitin®, in turn, increases the effectiveness of HPE-4 by 23 % (clinically proven), improves microcirculation, increases antioxidant skin status, and prevents photoaging.

Biologically active complex Neovitin® has anti-inflammatory, UV-protective, regenerating, antimicrobial, immunomodulatory and antitumor effects.

Mesotel for face and neck. 100 % Efficiency. Only 38 women from 40-43 years old.

## MESOTEL®

For the skin of the head

Stimulates hair growth, prevents its early graying and loss, prevents dandruff, strengthens hair follicles, increases hair elasticity, and improves the scalp's condition.

**MESOTEL FOR THE SKIN OF THE HEAD** is included in the hair care program. It helps to restore the normal acidity of the scalp.

It is recommended to use in combination with the hair balm **PEPTIDE BALSAM**. Apply 2-3 ml of mesotel to the skin of your head with massaging movements. Leave for 30 minutes and then rinse your hair. Apply daily. Duration of the course – 3 months.

Contains: anti-aging complex HPE-4, bioantioxidant complex Neovitin®, glycerin, extracts: burdock, hops, nettle; panthenol, tartaric acid.

50 ml

## MESOTEL®

For the body

Smooths out fine wrinkles, has a moisturizing effect, improves skin elasticity and its texture. Has a lifting effect and anti-cellulite action.

It is recommended to apply 4-6 ml of **MESOTEL FOR THE BODY** on cleansed body skin and rub in with massaging movements until complete absorption. Apply daily. The duration of the course is 3 months.

Contains: anti-aging complex HPE-4, bioantioxidant complex Neovitin®, glycerin, extracts: horsetail, aralia, artichoke; panthenol, lactic and succinic acids.

50 ml

## MESOTEL®

For the face and neck

Gives the most pronounced anti-aging effect for this class of drugs: smooths out fine lines, moisturizes the skin of the face and neck, increases skin elasticity and improves its texture.

It is recommended to apply 2-3 ml of **MESOTEL FOR FACE AND NECK** on pre-cleansed skin of the face and neck, rub with massaging movements until completely absorbed. The duration of the course is 3 months. In the first month, it can be applied daily, and in the future – 1-2 times a week.

Contains: anti-aging complex HPE-4, bioantioxidant complex Neovitin®, glycerin, rosemary extract, panthenol, lactic and citric acids.

50 ml

# DECORATIVE MAKEUP

## EXPRESSIVE LOOK AND SEDUCTIVE LIPS

Recently the spotlight, in the market of decorative cosmetics, has been on multipurpose products. After all, the pace of a modern woman's life has only been accelerating, and today makeup shouldn't only create a bright image, but also possess skincare and premature aging prevention qualities.

Decorative makeup products from Peptides include natural peptides of bone and

cartilage tissue, the vascular wall, and thymus. These peptides beneficially affect the restoration of microcirculatory blood flow and improve skin nutrition. Osteocartilaginous tissues peptides strengthen the hair follicles of the eyelashes and restore a strong anchor system of the hair in the bulb and surrounding tissues. Thymus peptides activate local immunity of the skin and healing processes.

Decorative cosmetics from Peptides – it is much more than just makeup. In addition to beauty, it brings health.

## A CELEBRATION OF NATURAL BEAUTY

The term “nude makeup” originated from the word nude, which means “naked”. Nude makeup should look as natural as possible. Hence the main rule: no bright colors.

Mascara and clear lip balm is the minimum requirement to create a light and natural look.

The moisturizing and radiant textures of PeptideLips balms create the most natural effect and give your lips a fresh, healthy look. The mascara PeptideLashes allows you

to evenly coat the eyelashes from roots to tips, giving them volume and expressiveness.

Experts advise after washing (you can use PEPTIDE CREAM-SOAP) and applying a tonic (it is worth paying attention to the “PH-balance tonic” from the REVILINE series); apply a moisturizing face cream (for example, cream RN 07 “Clean Skin” against “nets” and “stars”). After it is absorbed, you can proceed directly to applying makeup. The main thing is to avoid big amounts of

foundation and intense shades and apply your makeup in a thin layer.

With a nude makeup, you will easily create an effortlessly flawless look.

## Peptide Lashes® Mascara

Brown

The mascara provides an even coverage, does not smudge, creating an expressive look.

The peptide complex of cartilage tissue restores the collagen synthesis. Eyelashes become stronger and thicker. The Neovitin® complex protects eyelashes and eyebrows from inflammatory processes, and accelerates their growth and regeneration. Burgundy extract protects against UV rays.

**NEW!**

## Peptide Lashes® Mascara

Black, extension

PeptideLashes® Extension Mascara makes lashes longer and thicker. The secret is in a special formula, which includes the cartilage tissue peptide complex, protective Neovitin® complex and microscopic fibers. The natural carnauba wax and castor oil provide gentle protection and keep the necessary moisture inside each lash. The new silicone brush with ergonomic bristles makes the makeup ritual quick and easy.

**TIP from Peptides:** apply extension mascara in two coats: first along the entire length of the eyelashes, and then just on the tips. This will extend your lashes more, leaving you with a hypnotizing gaze.

**NEW!**

## Peptide Lashes® Mascara

Black, volumizing

You can add beauty and personality to your gaze with the help of a volumizing mascara. The new Peptide Lashes® Mascara contains the A-4 peptide complex, and the Neovitin® complex, which protects your eyelashes from inflammation, accelerating their growth and regeneration. Carnauba wax coats each hair to create more dense and voluminous lashes. Volumizing PeptideLashes® Mascara has a wide and comfortable silicone brush.

**TIP from Peptides:** the secret to incredible volume is to apply the mascara along the entire surface of the eyelashes, including the so-called outer eyelashes near the corners of the eyes.

Contains: **peptide complex A-4 (cartilage tissue)**, bur-marigold extract, Neovitin®.

7 ml

## PeptideLashes® Cream-Balm

Eyelash balm

The cream-balm nourishes and strengthens the roots of eyelashes, restores their structure and color, stimulates their growth and improves their appearance. Perfectly suited for the care of weakened and sparse eyelashes. The eyelash balm can be used both at night and as a base before applying makeup.

Contains: **peptide complexes A-4 (cartilaginous tissue), A-6 (thymus)**, bur-marigold extract, Neovitin®, castor oil, carnauba wax, hydrolyzed lupine protein, natural wheat gliadin protein extract.

7 ml

## PeptideLips® glossy balm

Lip gloss balm

Provides your lips with comfort and perfectly moisturizes them. The balm is easily absorbed and intensively nourishes the skin, but does not create a sticky feeling on the lips. It has antibacterial and antiseptic properties, promotes the healing of cracked lips, and gives them a bright shine.

## PeptideLips® balm

For lips

From the first use, the balm provides comfort, perfectly moisturizes your lips, relieves the feeling of dryness, promotes skin regeneration, accelerates the healing of cracked lips and slows down the aging process. It improves microcirculation and tissue trophism, has an immunostimulating effect, accelerates the recovery process of soft tissues, protects against UV rays and negative environmental influences. The balm also helps prevent inflammatory diseases.

Contains: **peptide complexes A-3 (vessels), A-6 (thymus)**, Neovitin®.

10 ml

# REVIDONT® PROFESSIONAL

## ORAL CARE PRODUCTS

**Proper daily care for teeth and gums is the key to a beautiful and healthy smile.**

REVIDONT PROFESSIONAL is an innovative series, the peculiarity of which lies in the principle of its action. It allows not only to deal with the symptoms, but also to influence the very cause of diseases of the oral cavity.

The REVIDONT® PROFESSIONAL line contains non-abrasive polishing agents that

are gentle on the enamel. The exclusivity of this series is due to its group of innovative, patented bioactive complexes and natural peptides that act in different groups of cells at the DNA level.

We got accustomed to thinking that to achieve perfect dental health we need to spend a lot of money and spend endless hours in the dentist's chair. However, the best guar-

antor of your oral cavity health always was and will be basic oral care that we provide for ourselves at home.

**Main active ingredients from the REVIDONT PROFESSIONAL series:**

1. **Vessel peptides** strengthen capillary walls, improve microcirculation and trophism of oral tissues, and reduce the bleeding of gums.

2. **Peptides of bone and cartilage tissue** provide a regenerating effect on the jaw bone tissue, strengthen the structure of the teeth and stimulate the synthesis of the enamel.

3. **Thymus peptides** have regenerating, trophic, and immunostimulating effects; accelerate the process of soft tissue recovery in periodontal disease, stomatitis and gingivitis.

4. **Mumiyo** is a natural biostimulant that significantly accelerates the rate of regeneration of the oral mucosa and gums.

5. **Silicon dioxide and titanium dioxide** are modern non-abrasive polishing agents that provide highly effective cleaning of teeth and are gentle on the tooth enamel.

6. **Sodium monofluorophosphate** is a fluorine-containing component that prevents the development of caries and strengthens the tooth enamel.

7. **Pyrophosphates** are a group of components that help remove plaque and enhance

protection against caries. Pyrophosphates prevent microorganisms from attaching to the surface of the teeth.

8. **Bioflavonoid complex Activitin®** is a patented extract of sage, chamomile, calendula and St. John's wort. The extract obtained from these plants contains a wide range of biologically active substances, both lipophilic (chlorophylls, carotenoids, phytosterols, terpenoids, fat-soluble vitamins), and hydrophilic (bioflavonoids, tannins, water-soluble vitamins), which have a healing effect on the mucous membrane of the oral cavity and gums. The biologically active substances contained in the extract relieve the inflammatory reaction, solve the problems of vitamin nutrition, moisturizing, regeneration, antioxidant and antimicrobial protection.

9. **Bioantioxidant complex Neovitin®** — a fraction obtained by a patented technology from ginseng root biocultivated cell mass, has a pronounced antioxidant and antitumor activity. The active components of Neovitin® contribute to the production in the body of not only antioxidant enzymes, but also interferon. It inhibits the reaction of lipid peroxidation of cell membranes, strengthens tissues, thereby increasing the body's adaptive resources.

10. **Birch bark extract Betulavit®** - is an exclusive component that has the most valuable pharmacological properties: anti-inflammatory, antibacterial, antifungal and regenerating. It helps to accelerate the healing of the oral mucosa and gums, strengthens the teeth and helps fight periodontitis, stomatitis and bad breath, thanks to its pronounced antibacterial properties.

11. **Hydroxyapatite** is a component related to the tooth enamel. It seals it and improves the structure by filling microcracks (microfilling effect).

## REVIDONT®

Peptide toothpaste for enamel restoration and reduction of tooth sensitivity

Contains peptides of blood vessels, cartilage and thymus, which contribute to the regeneration of bone tissue. It contains potassium citrate, which reduces the sensitivity of the enamel and dentin, hydroxyapatite, which is responsible for remineralization, zinc citrate, which slows down the formation of plaque, supragingival calculus, Neovitin®, which has anti-inflammatory, antioxidant, and regenerating effects.

Contains: **peptide complexes A-3 (vessels), A-4 (cartilaginous tissue), A-6 (thymus)**, birch bark extract Betulavit®, bioflavolipid complex Activitin, bioantioxidant complex Neovitin®.

 64 g

## REVIDONT®

oral elixir

The oral elixir is aimed at strengthening the tooth enamel, protecting teeth from caries, and suppressing the reproduction of pathogenic microflora. Lemon essential oil has an antiseptic effect, reduces the severity of inflammation, and gently freshens the breath. The components of lemon essential oil accelerate the regeneration of periodontal tissues, and have analgesic properties. Penetrating through the dentinal tubules, they block nerve irritation and quickly and effectively reduce pain.

Contains: hydroxyapatite, sorbitol, xylitol, caprylyl glycol, sodium fluoride, lemon essential oil, limonene, eugenol, **peptide complexes A-3 (vessels), A-4 (cartilaginous tissue), A-6 (thymus)**.

 90 ml

## REVIDONT®

bamboo toothbrush

The Peptides bamboo toothbrush is an environmentally friendly, hypoallergenic oral hygiene product. It has a healthy effect on teeth and gums, and is made from biodegradable materials, which are environmentally friendly. Nylon polymer bristles do not injure the gums or the tooth enamel, effectively remove plaque and delicately whiten teeth. The handle of the toothbrush is made from natural bamboo, which does not absorb moisture, does not slip in the hand and does not get moldy. Our assortment includes two toothbrush options: with blue and red stripes.

Materials: Nylon bristles — a biodegradable polymer that has strength and wear resistance during friction; it is distinguished by a high cleansing ability; handle - dried, crushed and pressed bamboo stalk.

 1 itm

## REVIDONT®

gum balm

The gum balm is designed to prevent gum diseases, has powerful immune-stimulating and anti-inflammatory effects. It has a regenerating effect on the jaw bone tissue, accelerates the process of recovery of soft tissues in periodontal diseases, stomatitis and gingivitis. Strengthens the structure of the teeth and stimulates the synthesis of the enamel, improves microcirculation and nutrition of the tissues of the oral cavity, reducing gum bleeding.

Contains: Neovitin®, peptide complexes A-3 (vessels), A-4 (cartilaginous tissue), A-6 (thymus).

15 g

## REVIDONT®

toothpaste for the prevention of oral diseases with peptides and SOD

The toothpaste with peptides and superoxide dismutase (SOD) is effective for the prevention of caries and as part of the complex treatment of gingivitis, periodontitis and stomatitis; has a regenerating, anti-inflammatory, tonic, and antioxidant effects. Improves microcirculation and nutrition of periodontal tissues, reducing gum bleeding, strengthens the structure of teeth and stimulates enamel synthesis, stimulates local immunity of the oral cavity, and prevents the formation of dental plaque.

Contains: AA-3 peptide complexes, vitamin E, azulene and panthenol.

64 g

## REVIDONT®

toothpaste for the prevention of periodontal disease with Neovitin®

The toothpaste with Neovitin® for effective prevention of periodontal disease has an antibacterial and regenerating effect. Can be used to prevent allergies and candidiasis, this toothpaste strengthens tissues, thereby increasing the adaptive resources of the body. The Neovitin® and Betulavit® complexes have an antioxidant and anti-inflammatory effect.

Contains: Betulavit® birch bark extract, bioflavolipid complex Activitin®, Neovitin® complex.

64 g

## REVIDONT®

toothpaste for the prevention of caries with mumiyo

The toothpaste with mumiyo is specially designed for caries prevention. The composition of the paste includes a natural biostimulant mumiyo, which significantly accelerates the rate of regeneration of the oral mucosa and gum tissue. The fluoride-containing component, sodium monofluorophosphate, prevents the development of caries and strengthens the tooth enamel. The complex Activitin® has an antimicrobial effect on the mucous membrane of the oral cavity and gums, and relieves the inflammatory reaction.

Contains: Activitin®, mumiyo.
